

Kiddy

Adventure Pack

Discover the world together.

Approx. 5 months – 4 years
7.3 – 28 kg
70 – max. 105 cm

* US version

The Kiddy carrier is the perfect choice for parents who love to discover the world together with their children.

Due to the low weight of only 2.8 kg and the individual adjustability it is the perfect companion for long walks and hikes.

The softly padded waist belt and shoulder straps provide the perfect comfort. Easily adjustable, it fits any adult perfectly. The child is fastened securely with the height-adjustable 5-point harness system

and the Soft-Tex material of the seat cover is especially soft and comfortable.

The carrier is well equipped for all kinds of hikes. The integrated sun and rain canopy can be extended depending on weather conditions. The most important travel items are cleverly stowed in the various pockets, with a drinks holder at the side for quick access. The stand can be automatically folded in and out while wearing so that the carrier can be safely set down with the child inside at any time.

We love our kids.

Features

1 Perfect fit for the child
With the height-adjustable 5-point harness system in three positions, the seat unit of the Adventure Pack adapts individually to the child's height. The Soft-Tex material used in the seat cover as well as the removable and washable protective padding ensure a great comfort.

2 Perfect fit for the wearer
The child carrier can be used by different people as the backrest can be adjusted to suit the size of the wearer. The ergonomic lumbar support relieves the lumbar spine. The padded and ergonomically shaped hip and shoulder padding provides stable and comfortable support. All elements are made of the Thermotex material which is especially breathable.

3 Integrated sun and rain canopy
Depending on the weather conditions, the integrated sun and rain canopy can be opened and extended using a zipper.

4 Generous storage space
Various compartments and pockets offer enough storage for the most important hiking equipment. Larger equipment can be stowed in the larger compartments at the back of the carrier. Smaller items for quick access can be placed in a pocket on the waist belt. The separate bottle holder at the side is very easy to access and well padded.

5 Folding stand
The stand can be folded out with just one hand while wearing the carrier. Because of its stability the carrier can be set down easily and safely at any time. Once back on the wearer's shoulders, the stand can be folded in again very easily.

Colors & Designs

The collection 2017 appears in a modern design with silver applications.

Softly padded fabrics and functional, high quality materials offer perfect comfort for both, child and wearer.
